adityasec32.systems | Patna, India (On-site: NIC, MeitY)

Open to relocation: Delhi NCR | Bengaluru | Chennai | Hyderabad | Pune | Mumbai | Jaipur | UAE | Singapore | UK | Germany
| EU | US

PROFESSIONAL SUMMARY

Results-driven Cybersecurity Engineer with 4+ years in Vulnerability Management, remediation orchestration, and security automation for government and Critical National Infrastructure (CNI). Proven record in vulnerability discovery, validation, and de-duplication; risk-based prioritization (CVSS + threat intelligence + asset criticality); and automating 120+ compliance baselines as policy-as-code across 750+ endpoints, cutting audit effort by 60%. Embeds shift-left/shift-right controls into Git-based CI/CD workflows, integrates security tooling with CMDB/asset inventory and ticketing platforms, and tunes SIEM/EDR telemetry to cut false positives by 30%.

CORE COMPETENCIES & TECHNICAL SKILLS

- **Vulnerability Management:** Infra & app scanning (Nmap, Burp Suite Pro, Wazuh), CVE/CVSS/CWE, OWASP Top 10, de-dup & contextual tuning, risk-based prioritization, remediation orchestration & SLA tracking.
- **DevSecOps & CI/CD Security:** Shift-left/right controls, SAST/DAST/SCA (Semgrep, OWASP ZAP, Trivy, Snyk), GitHub Actions & Jenkins workflows, policy-as-code guardrails, IaC checks (Checkov), Docker & Kubernetes security fundamentals.
- **Integrations & Automation:** CMDB/asset alignment (KACE UEM, 750+ nodes), ticketing/workflow integration (NIC-CERT/SDC), REST API integrations, SOAR-style script remediation, Python/Bash/PowerShell, Git.
- **Infrastructure & Cloud Security:** Palo Alto, Check Point, Fortinet, Default-Deny, ZTNA, Segmentation; AWS/Azure Fundamentals; Linux (RHEL/Ubuntu); secure-by-design patterns for dev & infra teams.
- **SIEM, EDR & Detection Tuning:** Wazuh, Splunk, SentinelOne, Trend Micro, Microsoft Sentinel, MITRE ATT&CK, DFIR; false-positive reduction via contextual analysis.

PROFESSIONAL EXPERIENCE

Ebix Technologies (Client: NIC, MeitY Government of India)

Patna, India

Security Administrator & Vulnerability Management Lead

Feb 2024 – Present

- **Vulnerability Management & Remediation:** Lead discovery, validation (PoC), and de-dup of infra/app vulnerabilities; prioritize via CVSS, threat intel, and asset criticality; orchestrate remediation with NIC-CERT/SDC via ticketing workflows across 750+ nodes.
- **Policy-as-Code & Compliance Automation:** Engineered Python/Bash automation enforcing 120+ CDAC/CERT-In baselines as code via KACE UEM (CMDB-aligned), embedding shift-right runtime checks; cut audit effort 60%.
- **CI/CD & Secure Change Control:** Maintain Git-versioned automation and configuration artifacts with peer review; validate patches/configs in staging pre-production (shift-left), reducing change-induced outages.
- **Detection Tuning:** Manage SentinelOne, Trend Micro, and Wazuh/Splunk; tune correlation rules via contextual analysis, cutting false-positive fatigue 30%.
- **Integrations & Observability:** Integrate asset inventory, synthetic monitoring (VC health, WAN latency, portal availability), and tiered alerting with FMS ticketing across 38 districts; produce SLA evidence.
- **NGFW & Secure-by-Design:** Architect default-deny Palo Alto/Check Point policies; audit public IP exposure; harden Linux racks; define secure-by-design patterns for infrastructure teams.

Independent Security Researcher

Remote

Offensive Security & Vulnerability Validation Focus

Aug 2023 – Jan 2024

- Executed advanced Active Directory exploitation labs (Hack The Box, VulnLab multi-forest), mastering Kerberoasting, DCSync, and Domain Controller compromise to validate enterprise postures.
- Pursued MBA (Cybersecurity) coursework and aligned certification trajectories (eJPT, CEH) to bridge defensive architecture with offensive methodologies.

RRG Engineering Tech (Client: DAE Nuclear Fuel Complex)

Kota, India

SOC Analyst – Threat Hunter & Detection Engineer

Dec 2022 – Jul 2023

- **CNI SOC & Detection Engineering:** SME in a 24/7 CNI SOC; tuned SIEM correlation rules and EDR policies, improving true-positive rates 35% while cutting false-positive noise.
- **Malware & Payload Analysis:** Reproduced adversary exploits in sandboxes to reverse-engineer TTPs, validate vulnerabilities, and update detection signatures.

E2E Networks Limited

SOC Analyst – IDS & Signature Development

Vellore, India
Aug 2022 – Oct 2022

- Authored and deployed custom Snort and Wazuh IDS signatures, improving detection coverage against novel attack patterns in a 24/7 SOC environment.
- Automated AbuseIPDB feed ingestion for real-time perimeter IP blocklisting, significantly reducing inbound malicious traffic and routing anomalies.

Teleperformance

Technical Support Executive (Microsoft Enterprise)

Jaipur, India
Dec 2021 – May 2022

- Delivered Tier-2 Microsoft enterprise product support via Rave ticketing, maintaining strict SLA compliance and contributing to internal knowledge base documentation.

KEY SECURITY PROJECTS

Portfolio, demos & technical write-ups: adityasec32.systems/projects

- **DevSecOps CI/CD Security Pipeline (Lab):** Built GitHub Actions pipelines embedding SAST (Semgrep), SCA/container scanning (Trivy), IaC checks (Checkov), and DAST (OWASP ZAP) across build-test-deploy stages of a Dockerized app.
- **State NOC Admin Portal (NIC Bihar):** HTML5/PHP dashboard monitoring 38 district nodes with traceroute diagnostics, outage alerting, and an Ollama LLM voice-enabled RAG chatbot.
- **Unified NOC Monitoring Suite (NIC Bihar):** Synthetic monitoring for VC health, district WAN speed-tests, and portal availability, with severity-tiered alerting and SLA reporting.
- **LAN Asset Management Portal:** Python/Bash portal for IaC-style automated OS deployment (DHCP/PXE) and secure internal file distribution.

EDUCATION

Chitkara University

MBA in Cybersecurity (In Progress)

Punjab, India
Expected Jul 2027

Manipal University Jaipur

B.Tech – Computer Science & Engineering

Rajasthan, India
2019 – 2022

Hindu College of Engineering

Diploma – Computer Science & Engineering

Haryana, India
2013 – 2018

CERTIFICATIONS

- **Earned:** Fortinet Certified Associate (FCA) in Cybersecurity (Jan 2026) | EC-Council “In the Trenches: SOC”.
- **In Progress:** eJPT (Q4 2026) | CEH v13 (2026) | CISSP (Targeted Q3 2027) | OSCP (2027+).

PROFESSIONAL DEVELOPMENT & LABS

- **DevSecOps Labs:** CI/CD security pipelines (GitHub Actions, Jenkins), SAST/DAST/SCA (Semgrep, ZAP, Trivy, Snyk), IaC scanning (Checkov), Docker & Kubernetes security fundamentals.
- **Offensive Security Labs:** Hack The Box (AD exploitation, privilege escalation) | VulnLab (multi-forest AD, DC compromise) | OPSEC & anonymity-network research (Tor).
- **Academic Coursework:** Security Management & Governance (Royal Holloway) | Network Security (Univ. of London) | Cryptography Foundations (Univ. of Colorado).

ADDITIONAL INFORMATION

- **Current Posting:** On-site at National Informatics Centre (MeitY), Patna; employer headquartered in Noida.
- **Relocation:** Open to Delhi NCR, Bengaluru, Chennai, Hyderabad, Pune, Mumbai, and Jaipur (family base); internationally open to UAE, Singapore, UK, Germany, EU, and US markets.
- **Work Authorization:** Indian citizen; open to UAE, Singapore, UK, Germany (EU Blue Card pathway), and EU roles with visa sponsorship; U.S. roles require sponsorship.
- **Languages:** English (Professional), Hindi (Native). | **Availability:** 60 days (negotiable).
